

INFORMATII GENERALE

| | |
|-------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Denumirea companiei | ARMCOMP |
| Tipul companiei (forme legale) | Societate cu raspundere limitata |
| Conducerea companiei | Armbruster Iacob, Armbruster Valeriu, Armbruster Eugen |
| Data infintarii | 14.04.1992 |
| Adresa completa a companiei | ARMCOMP srl 117155 Budeasa Mica 213, judetul ARGES ROMANIA |
| Site | www.armcomp.ro |
| Persoana de contact (nume, functie, telefon, fax, e-mail) | Armbruster Valeriu director comercial si calitate Mobile +40747111169 Telefon +40248236359, fax +40248236140 Email : vali@armcomp.ro |
| Sedii de productie si birouri | <ol style="list-style-type: none"> 1. Budeasa Mica (4km distanta de Pitesti) <ul style="list-style-type: none"> - Productie repere cauciuc, birouri - surfata totala: 10.000 mp - suprafata construita : 2.000 mp (data in exploatare in mai 2005) 2. Budeasa (7km distanta de Pitesti) <ul style="list-style-type: none"> - Productie repere metalice si injectie mase plastice - surfata totala : 1.300 mp - surfata construita : 800 mp |
| Domeniu de activitate si ponderea productiei | <p>Repere din cauciuc Producem repere din cauciuc, de la cele mai simple pana la cele mai complexe, in conditii standard sau speciale. Producem repere din NBR, EPDM, amestec PVC+NBR, silicon, cauciuc natural etc. Produsele noastre:</p> <ul style="list-style-type: none"> - garnituri pistoane - componente anti-vibratie - tampoane - bucsi - membrane (pentru : pompe benzina, carburatie, sisteme de injectie, regulatoare, valve de siguranta si altele) - bucsi de cauciuc cu armatua metalica - inele speciale - componente pentru sistemele de franare <p>Piese turnate aliaj neferos Producem repere mici de la cateva grame pana la maximum 1 kg din aliaj de zinc (zamak)</p> <p>Piese stantate</p> <p>Repere materiale plastice</p> |

| | |
|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Descrierea activitatii | <p>Activitatea principala este productia articolelor din cauciuc avnd in productie o gama de peste 500 diverse repere</p> <p>Incepand cu anul 2002 societatea s-a orientat catre export incepand cu Franta in domeniul garniturilor pentru echipamente anti incendiu si robineti industriali, continuand in 2005 cu export in ITALIA iar in prezent exportul cuprinde tari ca Germania, Olanda, Franta, Spania, Austria, Italia</p> <p>Planurile de viitor prevad integrarea procesului de fabricatie matrite. In acst scop se are in vedere construirea unei hale noi si achizitionarea de noi utilaje :</p> <ul style="list-style-type: none"> - Centru Vertical Frezare CNC - Strung comanda numerica |
| Schema de organizare | <p>Director General</p> <ul style="list-style-type: none"> - Director Tehnic - Director de Productie - Director Comercial si Calitate |

RULAJE

| | 2007 | 2008 | 2009 | 2010 |
|-----------------------------------------|------------------|------------------|------------------|------------------|
| Cifra de afaceri total lei (RON) | 2.412.000 | 2.426.000 | 2.390.000 | 2.875.000 |
| Industria auto % | 65 | 53 | 45 | 25 |
| Export % | 22 | 28.5 | 31 | 35 |
| Profit (lei) | 52.000 | 19.500 | 43.000 | 96.700 |

| | Client | Procent% |
|-----------------------------------------------------------------|-------------------------------------|---------------|
| Procentul vanzarilor pe importantii clienti in anul 2010 | Garnituri electrocasnice | 24 % |
| | Garnituri industriale Italia | 12.5 % |
| | Garnituri auto Spania | 11.3 % |
| | Piese auto Mioveni | 4.5 % |
| | Garnituri industriale Franta | 2.7% |

Angajati

| | |
|-----------------------------------------------------------|----------------------------------------|
| Numarul total de angajati | 50 |
| Organizarea muncii (schimburi /zi, zile/saptamana) | 3 schimburi/zi, 5zile/saptamana |
| Numar de muncitori | 37 |

PRODUCTIA

| | |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Utilaje pentru productia de cauciuc | <ul style="list-style-type: none"> - 1 malaxor 25 L - 3 valturi cauciuc, 1 dozator – extruder - 20 prese hidraulice (de la 250x250 la 600x600mm) - 2 prese injectie Rutil 400x400, 1500cm - 1 presa injectie 500x450, 170 to, 750 cmc - 1 presa injectie 600x550, 200 to, 700 cmc - 1 presa injectie Maplan 500x500, 250to, 1000cmc - 1 presa injectie REP 300x300 - calandru de 250 mm - instalatie debavurare cu azot lichid - intretinere matrite : cuva ultrasunete si sablare cu sticla - laborator dotat cu : malaxor, masina de tractiune, durometru, etuva, balanta analitica ... |
| Alte echipamente | <ul style="list-style-type: none"> - 6 stante - 5 strunguri - 6 masini injectie plastic |
| Capacitati de productie pe an | <ul style="list-style-type: none"> - amestecuri cauciuc : 200t - reperi din cauciuc : 80t - panza cauciucata : 10.000 mp - reperi injectie plastic : 20t - reperi stantate si ambutisate: 60t - reperi turnate sub presiune din zamak |
| Rata de eficienta a echipamentului (%) | 80% |
| Rata anuala a consumului de material (tone) | <ul style="list-style-type: none"> - 36 tone de cauciuc - 12 tone metal |
| Scule, matrite | <ul style="list-style-type: none"> - proiectare matrite - realizare matrite simple |

CALITATE

| | |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Certificate de calitate | <ul style="list-style-type: none"> -Certificat de Conformitate ISO 9001/2000 nr 055/10.12.2004 eliberat de RAR-OCS - Certificate de conformitate (nr 962 si 1759) de la Registrul Auto Roman pentru “garnituri din cauciuc pentru pompele hidraulice de frana “ si “colectii reparatie pompe frana” |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
